Next View Software Partners with LXE

Innovative Supply Chain Software Provider and Industry Leader in Wireless Mobile Computing Join Forces

Orange, CA – Next View Software, an innovative leader in the supply chain software market, announced today that it has signed a Co-Marketing Agreement with LXE, the mobile computer division of EMS Technologies, Inc, that allows Next View Software to market LXE’s rugged vehicle-mounted, handheld and wearable mobile computers.

“Next View Software is pleased to be partnering with LXE because they offer rugged and reliable mobile computing technologies that are extremely scalable. In addition, LXE provides a full range of turnkey services, including radio integration, project and installation management, wireless network design, technical support, and repair services, all of which are extremely important to our customers,” said Steve Simmerman, Business Development leader for Next View Software, Inc. “Our customers demand high-quality, long-term customer service and support. LXE is clearly a leader in this regard. LXE has the proven product and services offerings needed in order for us to deliver real-time solutions aimed at improving our customer’s overall efficiency and productivity.”

“LXE is committed to delivering innovative and reliable products to the marketplace. Next View Software provides extremely innovative and scalable software solutions, which complement our strategy very effectively,” said Tom Pate, LXE Director of Channel Sales. “The real-time visualization technology from Next View Software gives a business a live look at each employee or a facility as a whole. Having a powerful tool such as Next View as a co-marketing partner supports our commitment to finding new ways to improve supply chain productivity and ROI.”

“Next View Software offers a very robust and innovative product suite based on software technology from Microsoft, including the XNA framework and Windows Workflow Foundation. Our solutions are developed using a Service Oriented Architecture (SOA) utilizing Microsoft .NET 3.0 and ASP.NET 2.0 with AJAX. Our real-time visualization solution, Next View Live™, is the result of over 20 years of experience in the industry. Customers around the world have been asking for better visibility tools for years and the technology is in place to satisfy this demand,” continued Simmerman. “Other solutions available from Next View include integrated Warehouse Management System (WMS), Labor Management System (LMS), Yard Management System (YMS) and Warehouse Control Systems (WCS). We believe Next View solutions will enable business and IT organizations around the world to react faster to today’s rapid changes in supply chain requirements and to lower their total cost of ownership. We are pleased to be working with LXE in this regard.”
