## **Next View Software Announces On-Demand Subscription Based Labor Management & Productivity Solution**

Industry-leading On-Demand subscription-based LMS solution delivers workforce management and productivity improvements with rapid return on investment

**Orange, CA** – Next View Software announced today that it has launched its On-Demand, subscription-based Labor Management and Productivity solution.

“We have listened to many prospects and customers, and they all want to take advantage of the productivity improvements and labor savings associated with an LMS, but were unwilling to commit the dollars associated with traditional LMS offerings currently available. Our On-Demand LMS product and service offering allows our clients to realize these savings in a shorter period of time and at a greatly reduced cost compared to traditional hardware/software license offerings,” said Steve Simmerman, Business Development leader for Next View Software, Inc.

“Next View’s On-Demand LMS is a feature/function rich Labor Management and Productivity solution. We are providing what many analysts and consultants describe as “Tier 1” functionality at a much more attractive Total Cost of Ownership (TCO),” said Bob Rosales, COO for Next View Software. “Next View’s On-Demand LMS supports a wide variety of labor standards (Engineered Labor Standards, MOST, MTM, historical averages and more) as well as complete, configurable drill-down dashboards, reporting and query capabilities. We support our clients further with labor planning, time & attendance integration, incentive reporting and more. Together with our Implementation Partners we can offer a very flexible and scalable menu of services including implementation, training, on-going audit and review all in support of our client’s Lean and continuous improvement initiatives,” continued Rosales.

Next View Software is revolutionizing the way that supply chain practitioners use technology to continually improve their supply chain management and productivity. Next View’s On-Demand Warehouse and Labor Management & Productivity solutions provide customers with powerful management and analytical tools. Next View Live provides unmatched, leading edge visibility across the entire supply chain. “On-Demand applications allow us to continue to deliver supply chain productivity solutions that are simple better, faster and less expensive than traditional supply chain software models. It’s all about delivering excellent value to our clients so that they can realize benefits and returns,” continued Simmerman.
